

Organo-Sul

90% Elemental Sulphur

Organo-Sul is an effective soil amendment when used to correct alkali, saline and high pH soils by lowering soil pH through acidification. Repeat applications of Organo-Sul, over time, improves the soil by building sulfur oxidizing bacteria (*Thiobacillus*) populations that cause a number of important benefits including soil acidification.

GUARANTEED MINIMUM ANALYSIS:

Sulphur (S):.....90.0 %

DIRECTIONS FOR USE:

Organo-Sul is only to be used to amend agricultural soil to correct soil pH based on soil analysis and should be applied based on the calculations and advice of a professional agronomist or a qualified agricultural consultant. The application rate should be based on the expected reduction in pH when a particular volume of Organo-Sul is applied.

It is best applied by uniform broadcasting over the area to be treated and incorporated to the depth a professional agronomist or a qualified agricultural consultant has recommended, to effect a change in soil pH.

Conditions of sale: This product has a limited warranty. Acceptance of product constitutes agreement to terms and conditions listed on invoice and www.biofert.ca.

Conditions de vente: Ce produit a une garantie limitée. L'acceptation du produit constitue l'acceptation des termes et conditions indiqués sur la facture et sur www.biofert.ca.

Net Contents: / Contenu net:

25 kg

Lot No./N° de lot: **2021-64450**
